Here is a list of the largest planned battery projects in development in the US --ranked by planned capacity in megawatts. These projects are expected to come online in the coming ...

Explore the rapid growth of EV battery factories across North America, fueled by investments, policies, and job opportunities.

VW created a wholly owned subsidiary named PowerCo that is building a North American battery manufacturing plant in St. Thomas in Ontario, Canada, which will produce 90 gigawatt hours of ...

"Sun Valley is our first 100MW+ co located energy storage project in the U.S. We have more than 2.0 GW of energy storage already under construction in Texas and other ...

Those selected projects will retrofit, expand, and build new domestic facilities for battery-grade processed critical minerals, battery ...

Where are the EV batteries being produced in North America? A map tracking automaker and battery maker investment into battery cell ...

Where are the EV batteries being produced in North America? A map tracking automaker and battery maker investment into battery cell and module production for electric ...

Based on Tesla's calculations (100 GWh can power 1.5M EVs), that means North America will be able to produce batteries for up to 24 million EVs ...
