What type of electrical outlet does Argentina use?

Argentina uses Type I electrical outlets with standard voltage of 220V and 50Hz frequency. If your device plugs don't match Argentina's standards, we recommend purchasing suitable travel adapters in advance to ensure proper use. What power plug types are used in Argentina?

What voltage does Argentina use?

Argentina operates on a standard voltage of 220V and a frequency of 50Hz, with the most common plug type being type I. Visitors will typically need a plug adapter, but a voltage converter is usually not necessary as most electronic devices can operate on 220V.

What type of plugs does Argentina use?

By knowing that Argentina uses Type C and I plugs with a 220V voltage and 50Hz frequency, you can prepare adequately for your trip. Depending on your home country, you may need a plug adapter and possibly a voltage converter to keep your devices running smoothly.

Do I need a plug adapter in Argentina?

Argentina's standard voltage is 220V with 50Hz frequency. If your device is labeled "100-240V 50/60Hz", you only need a plug adapter. If the device only supports single voltage (like 110V or 220V devices), you'll need a voltage converter to protect your device from damage.
