The Mariana project will be exclusively supplied by power provided by an off-grid solar farm, producing 120 MW from solar panels with 288 MWp of battery storage.

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Indeed, the IEA's latest reports continue to forecast robust demand growth for lithium 13, despite recent supply additions outweighing with demand increase in the short ...

Beneath the plains of northwest Argentina lie some of the most abundant lithium reserves on Earth; from above, this sun-drenched corner of the country is among the regions ...

This geological marvel, spanning Argentina, Bolivia and Chile, holds over half of the world's known lithium reserves, with Argentina poised to become a linchpin in the global ...

This geological marvel, spanning Argentina, Bolivia and Chile, holds over half of the world's known lithium reserves, with Argentina ...

Let's face it - lithium is the rockstar of the clean energy transition. It's sitting on a VIP section of this global concert. With 41% of Latin America's lithium reserves ...

Argentina is rapidly adopting Battery Energy Storage Systems (BESS) to stabilize its renewable energy grid and meet growing power demands. This article explores the applications, trends, ...
