How did you manage to instantiate `CComObject<IExtendPropertySheet2>`? The template parameter of `CComObject` is supposed to be your class (usually implementing one or ...

Do you at least know which method is being called when the failure occurs? Can you show an IDL definition of this method? Are you using TLB-driven marshaling, or are you ...

I've been using Souseek for years and have always been impressed with how stable it runs. I'm running version NS 157 13e, which I prefer for the interface.

Description: Disable C4467 "usage of ATL attributes is deprecated" in midi robuffer.h causes ...

ATL, as the title speaks for itself is, NOT a Lease Deed. It is just an agreement between the authority and the allottee, wherein the allottee promises that he/she shall pay ...

Hi, I want to know if it is redundant to specify the "For Fetch Only" clause when specifying the "With UR" clause on a SELECT statement. My understanding is the "For Fetch ...

`ATL::CAtlServiceModuleT<T,nServiceNameID>::RegisterAppId`, which always attempts to write the registry key to HKCR. When per user registration is set, via ...
