What is Bahrain doing with solar power?

Bahrain is embarking on a significant clean energy initiative with its first major solar power project. The 150MW plant, located in South Bahrain, is slated for operation by Q3 2027. This public-private partnership aims to boost Bahrain's renewable energy share to 20% by 2035 and achieve net-zero emissions by 2060.

Will Bahrain launch 150MW solar project in Q3 2027?

Bahrain launches 150MW solar project as per an official announcement. The Kingdom's first major utility-scale solar power project is set for South Bahrain, covering 1.2 km², with operations expected by Q3 2027.

Why is Bahrain launching its first large-scale solar power plant?

Bahrain has launched its first-ever large-scale solar power plant project, a major milestone in the country's clean energy journey and commitment to environmental sustainability.

When will Bahrain's solar project tendering start?

Official project tendering begins Q4 2025. This solar project is a central part of Bahrain's National Renewable Energy Plan which targets raising the share of renewables to 20% of the energy mix by 2035. The plant alone is expected to:

Bahrain is making significant strides in its renewable energy journey with the launch of a major 150 MW solar project. This initiative marks a pivotal moment in the nation's ...

Bahrain launches a 150MW solar project to supply clean energy to 6,000+ homes, advancing its renewable energy goals and reducing carbon emissions.

Work has begun on Bahrain's first solar power plant for electricity generation, with a global market sounding set to start on August ...

Bahrain's first 150 MW solar tender marks major renewable shift. Learn about the project's specs, challenges, and what it means for Gulf solar energy.

Bahrain is embarking on a significant clean energy initiative with its first major solar power project. The 150MW plant, located in South Bahrain, is slated for operation by Q3 2027.

In sum, Bahrain's 150 MW solar tender marks a historic milestone. It signals the kingdom's commitment to diversify away from gas and tap into its abundant sun.

Work has begun on Bahrain's first solar power plant for electricity generation, with a global market sounding set to start on August 14 to present the project's technical and ...

Once operational, the solar facility is expected to generate enough electricity to power around 6,300 homes and reduce carbon ...

The plant, located near Bilaj Al Jazayer in southern Bahrain, is expected to start operations in the third quarter of 2027, providing power to approximately 6,300 homes. The ...

Designed to generate enough electricity to power more than 6,000 homes, the initiative is a cornerstone of the Kingdom's strategy to diversify its energy mix and reduce ...

Once operational, the solar facility is expected to generate enough electricity to power around 6,300 homes and reduce carbon emissions by more than 100,000 tonnes ...

Bahrain invites bids for its first large-scale 150 MW solar power plant near Bilaj Al Jazayer, aiming to generate for 6,300 homes and cut 100,000 t CO2 annually.
