Where can I find a UL certified battery containment enclosure?

Battery containment enclosures certified by UL Solutions to UL 1487 can be found in the online certification directory, UL Product iQ. Product iQ is available to use at no cost but requires a one-time registration.

How can lithium-ion batteries be protected?

These approaches take the form of publicly available research, adoption of the most current lithium-ion battery protection measures into model building, installation and fire codes and rigorous product safety standards that are designed to reduce failure rates.

What are battery containment products?

In addition to these prevention strategies, battery containment products have emerged which are purpose-built for mitigation of thermal runaway hazards of lithium-ion batteries and battery-powered devices that are stored and charged inside of them. UL 1487, Battery Containment Enclosures, was created to evaluate these products.

What is a CIBR battery rack?

Charles Indoor Battery Racks (CIBR) are modular, seismic Zone 4 rated (GR-487 certified) battery rack systems designed to fit the footprint of VRLA batteries from a variety of battery manufacturers or Saft Tel.X Ni-Cd batteries. In addition to several standard configurations, there are also single tray options that can be built on site.

Learn about battery storage cabinets--how they're designed, the standards they meet, and the best practices for lithium-ion battery ...

To ensure continuous network reliability, telecom sites must be equipped with robust, compliant, and scalable backup power systems. In this article, we'll break down the ...

Learn about battery storage cabinets--how they're designed, the standards they meet, and the best practices for lithium-ion battery safety. Explore features like fireproof ...

In modern telecommunications infrastructure, battery systems play a critical role in ensuring continuous service and system reliability. Whether supporting mobile base stations, ...

This flexible, modular design allows for installation in areas where it would not be practical or even possible to use a full-size, one-piece rack; such as rooftops, COWs/COLTs, small shelters, or ...

Adhering to safety standards for telecom battery cabinets is crucial for protecting personnel and equipment. Regulatory compliance ...

Adhering to safety standards for telecom battery cabinets is crucial for protecting personnel and equipment. Regulatory compliance ensures installations meet industry ...

UL Standards and Engagement introduces the first edition of UL 1487, published on February 10, 2025, as a binational standard for the United ...

Telecom battery cabinets are specialized enclosures housing backup batteries that provide uninterrupted power to telecommunications infrastructure during outages. They ensure ...

When telecom battery cabinets power our global communications, what happens if their fire protection fails? A 2023 NFPA report reveals that lithium-ion battery fires in telecom ...

UL Standards and Engagement introduces the first edition of UL 1487, published on February 10, 2025, as a binational standard for the United States and Canada.

The Alliance for Telecommunications Industry Solutions is an organization that develops standards and solutions for the ICT (Information and Communications Technology) industry.
