The purpose of this document is to provide details on the lessons learnt during the design and construction phase of the Liddell Battery Energy Storage Project.

Network company Ausgrid is planning two big batteries as its first foray into the world of major energy storage installations, with ...

Electricity distributor Ausgrid plans to build \$423 million worth of grid-scale battery systems across two NSW sites, capable of powering ...

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage ...

Our in-house Engineering and Design team will custom design the solution for the critical DC UPS to cater for the specific battery capacity required as well as the height and ...

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, ...

The Liddell Battery Energy Storage System (BESS) Project involves the development of a 500MW, two-hour duration grid-scale battery in New South Wales (NSW), ...

Our in-house Engineering and Design team will custom design the solution for the critical DC UPS to cater for the specific battery ...

The Smithfield battery energy storage system (BESS) will have a capacity of 65 megawatts (MW) and 130
