What is solarbronze glass?

Solarbronze glass has a warm bronze tint that adds subtle richness to the exterior and a warm glow to interior decor.

What are solarcool® glasses?

Combined in a one-inch insulating glass unit (IGU) with clear glass, Solarcool® glasses offer an expansive palette of appearance and performance options with solar heat gain coefficients (SHGCs) ranging from 0.34 to 0.14 and exterior reflectance of up to 37 percent.

Can solarcool® glasses be glazed?

Solarcool® glasses can be glazed with the reflective coating positioned on either the first or second surface. The glass has improved performance and higher exterior visible-reflectivity with a metallic sheen when installed with the coating on the first surface.

Can I use solarcool® glasses with vitro architectural glass?

Combine Solarcool® glasses with Vitro Architectural Glass (formerly PPG Glass) tinted glasses, such as Solargray®, Solarbronze®, Solarblue®, Azuria® or Pacifica®, to produce an even greater range of aesthetic options. Colors are reproductions and are for descriptive purposes only.

As global demand for renewable energy solutions surges, the Berne Photovoltaic Glass Production Base emerges as a game-changer for commercial and industrial applications.

The State Historic Preservation Office (SHPO) supports the use of solar panels in renovation projects, a use that is provided for in the Town of Berne Small Scale Solar Law.
