How many companies operate the gas Trans-mission system in Bosnia and Herzegovina?

Three companies in Bosnia Herzegovina operate the gas trans-mission system. In the Federation of Bosnia and Herzegovina, one company operates the transmission network as an exclusive and sole task in line with the Decree on Organisation and Regulation of the Gas Sector, but there is no legal basis for unbundling under the Third Energy Package.

Why is Bosnia & Herzegovina's energy sector so vulnerable?

This delay persists despite the ENTSO-E cybersecurity report from 2022, which identified Bosnia and Herzegovina's energy sector as one of the most vulnerable in the region due to outdated infrastructure and insufficient cybersecurity investments.

Does Bosnia and Herzegovina provide security of electricity supply statements?

Bosnia and Herzegovina is not providing the Security of Electricity Supply Statements to the Secretariat despite its obligation under Article 29 of the Treaty.

Is there a PECE project in Bosnia and Herzegovina?

There is no PECE project in the territory of Bosnia and Herzegovina, chosen under the procedure launched in 2024 for the Energy Community which relates to gas or hydrogen.

For the first time, battery storage will be permitted to provide auxiliary services such as secondary frequency regulation.

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide auxiliary services.

Integrating with frequency regulation aggregator dispatch systems to achieve millisecond-level response times, participating in Bosnia and Herzegovina's frequency regulation trading market ...

Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission

network, which will provide ...

The first half of 2025 saw many regulatory and legislative developments in the energy sector of Bosnia and Herzegovina. We draw attention to several of the most important ...

The final outcome of this document is a strategic analysis and a review of the strategic energy priorities of Bosnia and Herzegovina in its key segments, with a focus on several indicative ...

Located in Bosnia and Herzegovina, this project employs an integrated photovoltaic-storage solution offering significant advantages including high maturity, safety and reliability, low ...

The State Electricity Regulatory Commission is drafting a decision to allow battery energy storage systems (BESS) to offer secondary frequency regulation, Mirza Kusljagic, a member of the ...

There is no PECEI project in the territory of Bosnia and Herzegovina, chosen under the procedure launched in 2024 for the Energy Community which relates to gas or hydrogen.

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

Bosnia and Herzegovina stands at a pivotal juncture: renewable energy deployment, especially solar, is accelerating rapidly, and market rules have been developed to accommodate storage ...
