This policy briefing explores the need for energy storage to underpin renewable energy generation in Great Britain. It assesses various energy storage technologies.

British Solar Renewables (BSR) has secured a GBP345 million debt facility to support the development and operation of a 609-megawatt (MW) portfolio of solar and co-located ...

Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid ...

We are wasting no time in unlocking Britain's vast renewable potential by expanding wind and solar power. But we also need to increase our ability to store this energy ...

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in ...

Explore the latest news and expert commentary on Energy Storage brought to you by the editors of Solar Power Portal

British Solar Renewables (BSR) has secured GBP 345 million (EUR 400.9 million) in debt financing to support the development of 609 MW of solar and solar-plus-storage projects ...

We are wasting no time in unlocking Britain's vast renewable potential by expanding wind and solar power. But we also need to ...

This policy briefing explores the need for energy storage to underpin renewable energy generation in Great Britain. It assesses various energy ...

Developers of battery storage have been attracted to Britain by the structure of its energy markets and the growth of wind and solar power, according to investors and analysts.

Battery storage is becoming a cornerstone of the UK's clean energy future, just as solar has moved from marginal to mainstream. Together, they are reshaping the way energy ...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from Cornwall Insight.
