The energy transition won't be powered by better batteries alone. It's about creating storage systems that play well with others - and frankly, that's where the real revolution's happening.

With Bucharest's energy transition accelerating, the window for cost-effective retrofits is narrowing. By Q3 2025, new EU interoperability standards will mandate the very hybrid ...

As Bucharest aims to achieve 35% renewable energy integration by 2026, the energy storage chassis has emerged as the unsung hero. You know, it's not just about storing power anymore ...

Recent changes to Romania's grid-connection regime have reshaped the playing field. Financial guarantees, accelerated studies, and stricter timelines now favour technically ...

Let's face it - when you think of cutting-edge energy tech, Romania might not be the first country that springs to mind. But here's the kicker: Bucharest is quietly becoming ...

The "Energy Cube" is named POWER CUBE 150 and can power electric cars with energy captured from the grid or from photovoltaic panels. It is ideal for areas where the electricity grid ...

With Romania aiming to boost its renewable energy capacity to 30% by 2030, this tender could redefine how Eastern Europe handles grid stability. Think of it as the region's ...

These ambitious energy storage targets are aligned with transmission system operator Transelectrica's recommendations and ...

This Bucharest energy storage record isn't just a local win--it's rewriting the playbook for urban sustainability
