-----

Under the project, CNAB will develop a photovoltaic power plant with a total planned capacity of 31.5 megawatt-peak (MWp), complemented by an energy storage system of 30 ...

The investment includes the construction of a photovoltaic plant with a planned capacity of 31.5 MWp, combined with an energy storage system of 30 MWh.

This Bucharest energy storage record isn't just a local win--it's rewriting the playbook for urban sustainability worldwide. Let's unpack how they did it, why your city should ...

As Bucharest aims to achieve 35% renewable energy integration by 2026, the energy storage chassis has emerged as the unsung hero. You know, it's not just about storing power anymore ...

This landmark initiative will establish solar PV and energy storage infrastructure across 187 inhabited islands, positioning investors at the forefront of the region's sustainable energy ...

With Bucharest's energy transition accelerating, the window for cost-effective retrofits is narrowing. By Q3 2025, new EU interoperability standards will mandate the very hybrid ...

Based on the EU context and planning a significant uptake of renewable energy sources in its electricity mix over the following decades,Romania must also develop a strategy ...

In parallel with the new floating project, Renera Energy Romania is actively engaged in other initiatives, including Battery Energy Storage Solutions (BESS) and ground-mounted ...

The first stage provides for the construction of a photovoltaic power plant with an installed capacity of 12.6
