-----

In 2023, this project integrated battery storage, reducing diesel dependency by 40%. But here's the kicker: without subsidies, the upfront costs would've made investors flee ...

The upcoming Cameroon Energy Storage & Electrical Exhibition (CESEE) emerges as the linchpin for solving this decades-old challenge through cutting-edge battery systems and solar ...

With 65% of the population lacking reliable electricity access, the government's 2025 Renewable Energy Plan prioritizes storage solutions to support solar and hydroelectric expansion.

The Cameroon Douala Energy Storage Battery Project is reshaping how cities manage electricity demands. As Douala's population surges past 3 million, frequent blackouts and an ...

Release by Scatec, a distributed-generation solar and battery energy storage systems (BESS) solution, is set to expand its solar and storage capacity in Cameroon by 28.6 MW and 19.2 ...

Project, Tehachapi, California. A battery energy storage system (BESS) or battery storage power station is a type of energy storage technology that uses a group of batteries to store electrical ...

The groundbreaking ceremony on Monday, September 15, marked the second phase of a project that has been operational since 2022. The expansion will increase the ...

This 30kWh solar energy storage system was installed in Republic of Cameroon, in August 2025, and can reliably power a household. The system has a daily energy production ...

Improve and strengthen regulatory framework: A recurring issue in the electricity sector in Cameroon is delays in the completion of energy projects. We propose adequate oversight to ...

Scatec's PV and battery energy storage system (BESS) solution, called Release by Scatec, will be installed at sites in Maroua and Guida, in Cameroon's Grand-North region.
