---

Grenergy Renovables, an independent renewable energy company based in Spain, is delivering the world's largest hybrid solar and ...

This achievement reinforces Chile's position as a regional leader in energy innovation and storage solutions. The project not only supports the integration of renewable energy into the grid but ...

Discover how solar and storage projects by Zelestra are shaping Chile's grid, enhancing reliability, and driving Chile's energy transition.

Chile, whose energy mix has one of the region's highest shares of wind and solar power, offers a clear example of the challenges these dips can create.

This world-first installation played a vital role in stabilizing the grid in Northern Chile and demonstrated the potential of battery storage to enhance grid reliability and free up generation ...

Energy Storage Summit Latin America brings together developers, investors, utilities and policymakers to explore how storage is advancing system stability, regulation, ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Grenergy Renovables, an independent renewable energy company based in Spain, is delivering the world's largest hybrid solar and battery storage project, Oasis de ...

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and ...

Battery storage and flexible gas generation are expected to play a crucial role in facilitating the transition. The importance of having enough energy storage capacity is clear from the rising ...

The legislation includes measures aimed at speeding up investments in the power grid to free up capacity for additional renewable energy projects. Ongoing investments in ...
