The Chilean power utility Gasco is investing USD 71 million in three flat plate collector fields with a total capacity of 154 MW and will deliver heat for the electrowinning baths to the two copper ...

The Cerro Dominador project [15] will see the construction and operation of a 110 MW concentrated solar power plant with storage in the northern Chilean region of Antofagasta, ...

Priority funding is directed toward integrated solar-plus-storage demonstration projects in the Atacama Desert, aiming to accelerate the energy transition in northern Chile. The Atacama ...

Comprehensive techno-economic analysis conducted on the integration of solar heat into industrial processes across various regions of Chile.

Aerial view of Cerro Dominador, the first concentrated solar power plant in Latin America, in Antofagasta, Chile. The imposing 240-meter construction is one of the pillars of the ...

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the pillars of the country's ambitious green ...

Thanks to its novel storage system, the plant is able to produce energy 24 hours a day, not only during daylight hours. The energy generated at Cerro Dominador will be 100% ...

In Chile, the solar thermal regulation DS331, which utilizes a global modeling approach, governs the deployment of solar thermal systems (STSs) across highly variable ...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's ...

The Cerro Dominador project will see the construction and operation of a 110 MW concentrated solar power plant with storage in the northern Chilean region of Antofagasta, located in the Atacama Desert, one of the driest places with the highest solar radiation on earth. When finished, Cerro Dominador will be the largest CSP power plant with storage in Latin America. The facility will have a t...

Chile's Atacama desert is home to the only solar thermal tower in Latin America. The imposing 240-meter construction is one of the ...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.
