---

China is advancing a nearly 1.3 terawatt (TW) pipeline of utility-scale solar and wind capacity, leading the global effort in renewable energy buildout. This is in addition to China"s already ...

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country ...

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 ...

Electricity from solar has overtaken hydropower in China and is poised to surpass wind this year to become the country"s largest source of clean energy.

China has connected the world"s first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world"s highest. The intention is to harness the region"s bright sunshine, cold ...

China is leading the world in new solar and wind installations and doing so at a record-shattering pace. In May 2025 alone, the country added 93 gigawatts of solar capacity, ...

Rapid construction of photovoltaic (PV) solar projects across China"s largely arid northern and western provinces has skyrocketed China to certify itself as the world leader in ...

The offshore solar PV project was built off the coast of Dongying in the Yellow Sea. The HG14 offshore solar PV project was developed by Guohua Investment under China ...

The world"s largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world"s highest. The intention is to ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...
