Could Colombia benefit from a normative energy system?

Colombia could benefit from the development of a normative energy system scenario that is consistent with the legislated goal of net zero emissions by 2050, set out in the Climate Action Law (2169/2021).

Does Colombia have a coal policy?

From 2019 to 2021, domestic energy supply of coal decreased by 36% and the use of coal for electricity generation fell by 45%. Coal resources belong to the state and their exploitation is controlled by the MME. Colombia's energy and climate policy strategies do not include specific phase-out targets for coal production or consumption.

How does Colombia ensure security of electricity supply?

The main mechanism to ensure security of electricity supply is Colombia's reliability charge, which has also seen increasing participation from renewable energy capacity since 2019. The scarcity pricing formula was reformed in 2015/16 and today reflects the cost of the oldest diesel generator.

Why did Colombia adopt new security of gas supply rules in 2021?

In 2021, the Colombian government adopted new security of gas supply rules. Resolution 40280 of 30 August 2021 updated the framework for the MME to regulate gas demand constraints and rationing of the supply of natural gas to satisfy essential demand of priority consumers, refineries.

A recent resolution from Colombia's Energy and Gas Regulatory Commission (CREG) -- allowing battery storage systems to be formally integrated into the national grid -- ...

The core of this new policy lies in breaking the traditional energy monopoly. Through innovative "virtual boundary aggregation" technology, it allows power generation units ...

The Energy Transition Law expanded policy actions and tax benefits to energy efficiency and low-carbon energy technologies, including geothermal, carbon capture and storage (CCS), and ...

The Energy Transition Law expanded policy actions and tax benefits to energy efficiency and low-carbon

energy technologies, ...

A new regulatory proposal from the Colombian government outlines the technical and commercial rules for energy storage assets. The framework targets both the national grid ...

The group's members anticipate that the insights gained from this initiative will support Colombia's energy transition efforts as well as Latin America's overall regional ...

Ever wondered how a country known for coffee and emeralds is tackling the global energy puzzle? Meet Colombia - a rising star in energy storage policy innovation.

The Energy Transition Law expanded policy actions and tax benefits to energy efficiency and low-carbon energy technologies, including geothermal, carbon capture and ...

Colombia's energy transition is entering a new and decisive stage. While the country continues to expand its renewable energy portfolio, especially in solar and wind, its ...

Colombia's national mining and energy planning unit UPME last week finalised the tender process for the full delivery of a 45-MW battery energy storage system (BESS), awarding the ...

Define the general vision for Colombia's energy transition policy and set out practical actions needed to reconcile the affordable and secure energy growth required to support Colombia's ...

The Energy Transition Law expanded policy actions and tax benefits to energy efficiency and low-carbon energy technologies, including ...
