Specializing in off-grid renewable energy systems for island communities, we deliver turnkey solutions combining solar panels, lithium-ion batteries, and industrial-grade inverters.

Navitas is an industry leader in GaN power technology with a wide portfolio of GaNFast(TM) power ICs, which enable high-frequency, high-efficiency power conversion, achieving 3x more power ...

New solar plus battery projects in the Cook Islands demonstrate how off-grid regions can escape reliance on diesel generators. Six of the twelve inhabited Cook Islands are the target of hybrid ...

The Cook Islands is a recipient of the Fund and has committed to installing Solar (PV) systems for the islands of Rakahanga, Pukapuka, Nassau, Suvarrow and part of Manihiki.

The high voltage frequency converter integrate the most advanced motor vector control algorithm, high control precision, fast response, low frequency, high torque.

Low frequency pure sine wave inverter without battery for solar power system, with 40kW output power, converts 240V DC to 480V AC. This off grid inverter is widely used for ...

Cook Islands High Frequency Power Inverter Manufacturer Since its establishment in 2010, Power Electronics, a solar inverter manufacturer from Spain, has been shining brightly in the ...

The company aims to generate clean & affordable electricity, using a simple but smart design, allowing the floaters to be attached to existing man-made structures, and thereby simplifying ...

With 12+ years specializing in tropical PV systems, we've deployed over 200MW across Pacific islands. Our
