---

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications in rural electrifications, particularly solar ...

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS).

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. This system will participate ...

EGEPC has launched a tender for a 40 MW solar plant with Battery Energy Storage System (BESS) to enhance the efficiency of its Punta Catalina thermoelectric plant in the ...

Guided by an ambitious goal to reach 300 MW of energy storage capacity by 2027, the nation is working to enhance grid stability and reliability, paving the way for a cleaner ...

Guided by an ambitious goal to reach 300 MW of energy storage capacity by 2027, the nation is working to enhance grid stability ...

The solicitation specifically seeks to contract new wind and solar photovoltaic generation bundled with storage systems, with project capacities ranging from 20 MW to 300 ...

A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational ...

The Dominican Republic has launched a tender for up to 600 MW of solar and wind capacity, requiring projects to include at least four hours of battery storage to support ...

Joel Santos, minister of energy and mines in the Dominican Republic, announced a goal of 300 MW of battery energy storage ...

Located in the northern municipality of Nagua, the Payita 2 solar park will be paired with a 4-hour duration 15MW/60MWh battery energy storage system (BESS).

The project aims to provide technical assistance to the MEM to enhance the integration of energy storage systems into renewable energy applications ...
