What is a DSM power supply?

DSM series (80-640KVA) As a leading UPS supplier in China, SCU provides DSM series industrial uninterruptible power supply that has super power grid adaptability and load capacity, higher protection level and multiple operation modes.

What is an UPS (uninterruptible power supply)?

An UPS (Uninterruptible Power Supply) is a backup power device that allows the Synology NAS to continue operating for a short time if power failure occurs.

Does ups support shutting down by DSM?

Some UPS devices do not support shutting down by DSM. Before using the UPS in production environment, please conduct a power outage simulation test to determine if the UPS performs as expected. To conduct the test, tick Shut down UPS when the system enters Standby Mode, click Apply, and manually remove the power cable of the UPS.

How to choose the right uninterruptible power supply for Synology NAS?

Sep 2025 Choosing the right Uninterruptible Power Supply (UPS) for Synology Network Attached Storage (NAS) is crucial to protect data from power interruptions and ensure system stability. For 1-2 bay NAS devices, from 500-850VA should be enough (with desktop PC and router connected). For 4-8 bay NAS devices go from 1000-1500VA.

The DSM series UPS system is an on-line UPS system, which operates ...

The APC 750i is designed to protect your data and hardware from power cuts or power surges from your mains power supply. Please note that when you first setup your APC 750i, you ...
