Is the powerup 32K a good power bank?

The features on the PowerUp 32K were the most impressive of any power bank in my test. First off, it had an AC outlet, which was powered by a simple on/off button that was separate from the USB on/off switch. You wouldn't think that you'd need an AC outlet while out camping, but when it does come up it's so handy to not have to worry about it.

Do you need a power bank for hiking?

Electronics are essential items in many hikers' backpacks, so getting the best power bank to keep them going on trail is really important. Whatever your electronics setup looks like, we know it can be a real drag when something runs out of juice in the backcountry.

Can a power bank charge multiple electronics at the same time?

Most power banks had at least two charging ports and could charge multiple electronics at the same time. The UGREEN and INIU 20000 are the only options with digital displays, and both INIU models also have built-in flashlights. We really love how many plug-in ports the Charmast power bank has, which makes this model very flexible to use.

Buy EK-4001 5000mAh Portable Charger Power Bank, Magnetic Wireless Power Bank Fast Charging with Foldable Stand, Compact Design, Overvoltage ...
