Bako Motors is building compact electric cars and cargo vans with solar panels on the roof, letting them charge directly from sunlight and cut their dependence on wall sockets ...

Several cars with solar cells are in development. Furthermore, already more than 100 truck trailers are driving through Europe, with solar cells on its trailer roof, making commercial transport ...

The results of the measurements confirm that solar panels on vehicles can be a valuable, mobile source of renewable energy for the transport sector. However, the findings ...

At least six Eastern European nations will generate over 20% of their total monthly utility-supplied electricity from solar farms this summer, when regional solar radiation levels hit ...

On trade, Beijing wants the European Union to rescind its tariffs on electric cars from China and take other measures to allow more ...

Solar cars are electric cars that use photovoltaic (PV) cells to convert sunlight into electrical power to charge the car's battery and to power the car's electric motors. Solar cars have been ...

The table below outlines the key aspects of feed-in tariffs and subsidies for solar cars in Europe, as well as the challenges they face and their impact on the solar car market ...

Solar cars are electric cars that use photovoltaic (PV) cells to convert sunlight into electrical power to charge the car's battery and to power the car's ...

Electric cars with solar panels turn light into energy to increase range. Find out what they are, how they work, and the real benefits.

Bako Motors is building compact electric cars and cargo vans with solar panels on the roof, letting them charge directly from sunlight ...

Renault Group, along with MyWheels and We Drive Solar, will launch a vehicle-to-grid charging project in Utrecht, Netherlands, using a ...

Renault Group, along with MyWheels and We Drive Solar, will launch a vehicle-to-grid charging project in Utrecht, Netherlands, using a fleet of Renault 5 E-Tech hatches that ...
