-----

By technology, batteries led with 82% of the United States energy storage market share in 2024, while hydrogen storage is projected to expand at a 28.5% CAGR through 2030.

Nearly 11,000 MW of energy storage were added in 2024 to supplement generation capacity, increasing the total MW of energy storage 62% within the last year and 181% in the last two ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Technological breakthroughs and evolving market dynamics have triggered a remarkable surge in energy storage deployment across the electric grid in front of and behind-the-meter (BTM).

Despite policy changes and uncertainty in the world's two largest markets, the US and China, the sector continues to grow as developers push forward with larger and larger ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. battery storage already achieved record ...

HOUSTON/WASHINGTON, D.C., March 19, 2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, ...

The U.S. energy storage market size crossed USD 106.7 billion in 2024 and is expected to grow at a CAGR of 29.1% from 2025 to 2034, driven by increased renewable energy integration and ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage

market in 2025 and beyond.
