Is Estonia a 'historic' moment for the Baltic energy sector?

Karl Kull, CEO of Evecon, believes the groundbreaking represents a "historic" moment for Estonia and the entire Baltic energy sector for two primary reasons. "First, this is an extremely important and real step to prepare the synchronisation of the Baltic countries.

How has the transition to a 15-minute balancing period impacted Estonia's energy storage?

State-owned energy company Eesti Energi management board member Kristjan Kuhi recently highlighted to Energy-Storage.news Premium that the transition to a 15-minute balancing period and the desynchronisation of the Baltic electricity system from the Russian grid have spurred growth in Estonia's energy storage sector.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

When is the Energy Storage Summit Central Eastern Europe?

The Energy Storage Summit Central Eastern Europe is set to return in September 2025 for its third edition, focusing on regional markets and the unique opportunities they present.

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and emergency applications, our solutions ...

The implementation of such a large-scale energy storage project is an example of ambitious actions towards decarbonization, while also demonstrating how international ...

As we approach 2025's energy crunch season, Tallinn's storage fleet stands ready to power 63,000 homes through 72-hour outages. Not bad for a city that only started its storage push in ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy

storage, with a focus on the ...

The objective of the measure is to carry out a pilot programme on renewable energy storage in Estonia. The knowledge acquired in this pilot programme is expected to provide a basis for the ...

With hydrogen presence in Estonia being fairly limited due to lack of large-scale hydrogen production in the country as well as very few fuel cells implemented in real applications, this ...

Discover our high-efficiency, modular battery systems with zero capacity loss and rapid multi-cabinet response. Ideal for industrial, commercial, and ...

Utilizing a comparative case study framework approach, this research combines desk research, stakeholder workshops, and case study interviews to analyze five diverse EC ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

Summary: Discover how modern energy storage cabinets are transforming industrial and commercial operations in Tartu, Estonia. Learn about cost-saving strategies, renewable ...

TALLINN, Estonia, April, 2024The Estonian Ministry of Climate signs the Memorandum of Understanding (MoU) with energy company Zero Terrain to help Estonia achieve its 100% ...

This isn't sci-fi - it's the reality of Tallinn photovoltaic energy storage cabinets, the unsung heroes of Estonia's green revolution. Let's peel back the metal casing to see why ...
