At a capacity of around 290 MW, it was a pioneering project that showcased the viability of storing and then re-expanding compressed ...

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates.

The firm behind the energy storage project is the Estonian startup Zero Terrain, and they are not shy about the touting the supply chain advantages of hydropower over other systems.

It is the only permitted greenfield pumped hydro energy storage project in the Northern Baltic region and will become the largest facility of its kind in Estonia. Construction of ...

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of ...

Baltic Storage Platform, a joint venture (JV), has broken ground on two new 200MW/400MWh battery energy storage systems (BESS) in ...

At a capacity of around 290 MW, it was a pioneering project that showcased the viability of storing and then re-expanding compressed air for electricity generation.

Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took ...
