Solar system, assemblage consisting of the Sun and those bodies orbiting it: 8 planets with more than 400 known planetary satellites; many asteroids, some with their own satellites; ...

Visuals from the European Space Agency's Solar Orbiter reveal chaotic solar magnetism in the solar polar region. Even better images are expected in the years ahead.

Solar Orbiter is currently collecting information on several solar phenomena, including the sun's magnetic field, its activity cycle, and the solar wind - a constant, high-speed stream of charged...

Thanks to its newly tilted orbit around the Sun, the European Space Agency-led Solar Orbiter spacecraft is the first to image the Sun's poles from outside the ecliptic plane.

Thanks to its newly tilted orbit around the Sun, the European Space Agency-led Solar Orbiter spacecraft is the first to image the Sun's ...

The European Southern Observatory recently released images of a dance party in the night sky with the Moon, comets, and planets in our solar system in full view.

Using the ALMA telescope, in which the European Southern Observatory (ESO) is a partner, and the James Webb Space Telescope, ...

Led by the European Space Agency (ESA) with contributions from NASA, Solar Orbiter launched in February 2020 and has been monitoring our home star since November ...

SolarPower Europe is the award-winning link between policymakers and the solar PV value chain. Get to know the SolarPower Europe team working to transform the European ...
