What's Next for Greek Energy Storage? As Greece finalizes its National Energy & Climate Plan (NECP), expect more hybrid projects combining pumped storage with emerging tech.

The Greek company TERNA S.A., construction branch of GEKTERNA Group, awarded the international technology group ANDRITZ a contract for the supply of electromechanical ...

In recent weeks, only months after Greece revised upward its NECP target for storage, there has been a strong policy momentum both in Greece and the EU, promoting ...

Compact and light compared with traditional alternatives, these cutting-edge energy storage systems are ideal for applications with a high energy demand and variable load profiles, ...

These systems could also lower prices on the day-ahead market, where Greece has remained among the most expensive EU ...

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted ...

Currently there are four (4) storage plants operating in Greece, two open-loop pumped-hydro storage (PHS) stations in the mainland (700 MW in total) and two small hybrid RES-storage ...

Whether you're powering a villa in Corfu or an Athens startup hub, picking the right Greek energy storage battery brand could be your smartest move since inventing democracy.

The national target for storage, set in the 2019 National Energy and Climate Plan at 2.3GW of new capacity, is

due to increase to 8GW in ...

A draft ministerial decision envisages the installation of 3.55 GW of standalone battery energy storage systems which will be granted priority connection to the transmission or ...

Greek renewable energy company Principia has completed the construction of its first battery energy storage system (BESS), known ...

The national target for storage, set in the 2019 National Energy and Climate Plan at 2.3GW of new capacity, is due to increase to 8GW in the 2023 NECP revision.
