How many power stations are there in the UK?

Without further ado, let's plunge into the numbers. As of our latest count, the UK is home to 4 coal, 38 gas, and 3 oil power stations. The renewable sector is more fragmented, with approximately 2,000 wind farms (including both onshore and offshore), over 1,000 solar farms, and around 200 hydroelectric power stations.

Are solar power stations a good investment in the UK?

Sunny days in the UK might be a rarity, but solar power stations are a growing feature of the nation's energy portfolio, capitalizing on advancements in solar technology. Riding the wave of renewable energy, hydro power stations utilize water flow to generate electricity, boasting both large-scale and small-scale setups across the UK.

How many nuclear power stations are there in the UK?

The renewable sector is more fragmented, with approximately 2,000 wind farms (including both onshore and offshore), over 1,000 solar farms, and around 200 hydroelectric power stations. The UK hosts 7 operational nuclear power stations, with several more either decommissioned or in the planning stages.

Where can I find data on UK power sites?

We've launched a UK Power Sites section where you can access data for over 3,000 power stations, wind farms, solar parks and other operational sites. Many now have dedicated pages with live generation data, interactive maps, and photos -- helping you understand how individual assets behave and how they contribute to the wider electricity system.
