How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

How much does a solar battery cost in 2025?

In 2025, a typical solar battery installation costs \$9,000-\$18,000 before incentives and \$6,000-\$12,000 after credits. By 2026, continued cost declines are expected to make home energy storage even more accessible, with prices averaging 8-12% lower than current levels.

How much does it cost to install a solar battery?

As of early 2025, the average cost to install a home solar battery in the U.S. ranges between \$9,000 and \$18,000 before incentives. After applying the 30% federal tax credit, most homeowners pay \$6,000 to \$12,000 for a complete setup. For a deeper dive into specific models and performance, explore our Best Solar Battery for Home guide.

How many solar backup batteries do I Need?

Most homeowners only need one solar battery to help supply electricity during power outages or low sunlight hours. For example, a 400 amp-hour, 6-volt battery can provide around 2.4-kilowatt hours (kWh) of power. How long will solar backup batteries last?

With the rise of solar panel for home use, the demand for solar battery storage has increased significantly. In this guide, we'll break ...

A report from the National Renewable Energy Laboratory (NREL) estimates that a solar battery including ...

A report from the National Renewable Energy Laboratory (NREL) estimates that a solar battery including installation can cost almost \$19,000* to install, including the price of the ...
