How do I get a price estimate for solar?

Use our calculator to quickly get price cost estimates for solar tailored to your home. SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you identify the best solar panel installation companies in your area.

How much do solar panels cost?

As of 2025, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type, and installer.

Are solar panels tax deductible in New York?

For example, New York has all three with its NYSEERDA rebate, 25% state tax credit, and sales and property tax exemptions for solar installations. At the local level, many city governments, municipal utilities, and investor-owned utilities have incentives for solar panels, battery storage, and other energy-efficient home upgrades.

How much does a solar system cost per watt?

Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.
