Does South Africa have more electricity than North Africa?

South Africa and North Africa account for less than 20% of the population but more than 45% of energy investment and over 65% of installed electrical capacity. By contrast, Sub-Saharan Africa, home to most of the region's population, receives less energy investment and has limited access to reliable electricity.

How much money does Africa need for energy projects?

Public and development finance (DFI) funding for energy projects in Africa has fallen by approximately one-third in the last ten years, reaching USD 20 billion in 2024, largely due to a reduction of more than 85% in spending by Chinese DFIs.

How much energy is invested in Africa?

Over the past decade roughly half of energy investment in Africa has been in oil and gas, primarily made by private companies with a view to export. Meanwhile, spending on clean energy remained relatively flat at less than USD 30 billion per year until 2021.

Why is renewable electricity so important in North Africa?

Over the last decade, renewable electricity in North Africa has grown more than 40%, driven by the rapid expansion of wind, solar photovoltaic and solar thermal. Renewables play a minor role in the transport sector across the region, with still few electric vehicles that can use renewable power and low levels of biofuels.

Building on this framework, this report identifies pathways and recommendations to accelerate clean energy transitions in five North African countries (Algeria, Egypt, Libya, ...

The African Development Bank (AfDB) announced that it would commit \$379.6 million over the next seven years to provide funding for 500 MW of solar energy and storage for the Desert to ...

Africa is characterised by strong regional imbalances. South Africa and North Africa account for less than 20% of the population but more than 45% of energy investment and over 65% of ...
