How much does it cost to install electricity on land?

The cost to install utilities on land can vary wildly. According to recent data, you're looking at anywhere from \$2,500 to \$12,500 to run electricity from the road to your house, or about \$5 to \$25 per linear foot. But what factors into this price tag?

How much does it cost to connect land to utilities?

Connecting your land to local utility services is not a DIY project. Always hire a professional. When a fresh start on new property also means getting utilities on land, you could pay anywhere from \$100 to \$60,000 to set everything up.

How much does it cost to prepare a property for utilities?

Preparing a property for utilities may involve several projects, depending on the location and site conditions: A new construction land survey costs \$400 to \$1,800 and defines the property's boundaries and topography. Land clearing costs \$1,150 to \$3,680 to clear the land to build a house.

How much does it cost to run electricity from the road?

According to recent data, you're looking at anywhere from \$2,500 to \$12,500 to run electricity from the road to your house, or about \$5 to \$25 per linear foot. But what factors into this price tag? Some electric companies might provide a certain amount of wire and trenching for free, and you only pay for the extra. Others...
