Rogue communication devices have been discovered in Chinese made solar inverters, devices which play a "critical role" in renewable energy infrastructure, Reuters ...

TOKYO -- China's Huawei Technologies has raised the ratio of domestic components in its new smartphones to nearly 60% by value, a new teardown shows,

Huawei remains a top-tier producer of photovoltaic inverters, commanding 23% of global market share as of Q1 2025 according to Wood Mackenzie's latest renewable energy ...

Cells and wafers now make up over 40% of China's solar product exports in the first half of 2025. Panel exports are stagnating due to stockpile drawdowns and slowing ...

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as ...

Chinese solar exports at an all-time high despite drop in revenue. China's 2023 solar exports hit a record high with over 40% ...

Exports of both PV cells and module from China in 2024 reached new highs, according to recently released customs data.

Huawei provides a one-fits-all solution that integrates optimizers, PV, ESS, chargers, loads, grid, and management system to help various industries go green and low ...

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules), exceeded demand by at least ...

Chinese solar exports at an all-time high despite drop in revenue. China's 2023 solar exports hit a record high with over 40% growth for all equipment. The surge was dominated by ...

The export value, which includes photovoltaic products such as silicon wafers, cells and modules, reached about \$43 billion during the first 10 months, the China Photovoltaic ...

As the world combats climate change, energy storage provides an essential bridge, allowing for efficient use of renewable power sources such as wind and solar. Huawei, in its ...
