-----

The ContainerBridge Solar Shade Kit offers a fast and efficient solution for creating a 20" x 20" solar array using two standard shipping containers as a foundation.

Cool-Watt(R) is a solar power plant designed as a 20 feet maritime container, pre-cabled and pre-tested so that it can be deployed ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

This containerized energy solution combines power, protection, and portability in a compact, scalable format. It is pre-engineered for plug-and ...

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power system capable of supporting diverse energy needs.

This ambitious endeavor transforms a standard 20-foot shipping container into a high-capacity, modular, and off-grid power ...

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, ...

The 20ft solar-powered container is the final answer to speedy deployment, inexpensive power generation and a clean energy tomorrow. ...

This containerized energy solution combines power, protection, and portability in a compact, scalable format. It is pre-engineered for plug-and-play deployment, reducing installation time ...

The 20ft solar-powered container is the final answer to speedy deployment, inexpensive power generation and a clean energy tomorrow. Disaster relief after a catastrophe ...

Cool-Watt(R) is a solar power plant designed as a 20 feet maritime container, pre-cabled and pre-tested so that it can be deployed in less than 1 hour without civil engineering or ...

We are offering mini renewable power stations in a Off-Grid shipping Container ready to be deployed worldwide. These include solar PV panels and mountings.
