---

Ireland could host Europe's first large-scale, iron-air project southwest of Buncrana town in Donegal County. The 10 MW facility proposed by FuturEnergy Ireland will be capable ...

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air ...

If this pipeline was built out, the report states that Ireland could capture all of that wasted energy, further reducing our reliance on fossil fuels, and driving down energy costs for ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

FuturEnergy Ireland, a joint venture between Coillte and ESB, has been granted planning permission to build Europe's first iron-air battery facility, a new technology that ...

These projects highlight not only the technical feasibility of gravity storage but also its potential to become a key component in a diverse portfolio of energy storage solutions.

The main opportunity for the storage of energy in gaseous molecular form (including future biogas and hydrogen developments) in UGS is linked to its distinctive ...

Ireland could host Europe's first large-scale, iron-air project southwest of Buncrana town in Donegal County. The 10 MW facility ...

This would increase Ireland's energy storage capacity almost eightfold - enough to power every home in Ireland twice over on a still, cloudy day. Last year, 14% of all wind ...

A ground-breaking project to store renewable energy using gravity is taking shape in Edinburgh. The demonstration project - at Forth Port's Prince Albert Dock - is being ...

FuturEnergy Ireland is targeting the delivery of 1GW of renewable energy by 2030 through the development of high-quality onshore wind and battery storage projects.
