What should you do if you hear a thunderstorm?

If signs of approaching thunderstorms occur, workers should not begin any task they cannot quickly stop. Proper planning and safe practices can easily increase lightning safety when working outdoors. When thunder roars, go indoors! If you hear thunder, even a distant rumble, get to a safe place immediately. Thunderstorms always include lightning.

Is it safe to go outside during a thunderstorm?

Even though metal does not attract electricity, it is a good conductor and can make injuries, such as burns, worse if struck. When thunder roars, go indoors. Although no place outside is safe during a thunderstorm, you can minimize your risk by assessing the lightning threat early and taking appropriate actions.

Where is the safest location during a thunderstorm?

The safest location during a thunderstorm is inside a large enclosed structure with plumbing and electrical wiring. These include shopping centers, schools, office buildings, and private residences. If lightning strikes the building, the plumbing and wiring will conduct the electricity more efficiently than a human body.

How do I protect my home during a thunderstorm?

Cut down or trim trees that may be in danger of falling on your home. Consider buying surge protectors, lightning rods, or a lightning protection system to protect your home, appliances, and electronic devices. Secure outside furniture. When thunder roars, go indoors. A sturdy building is the safest place to be during a thunderstorm.
