New Floating Solar Array Breaks Ground in Lima, Ohio Oct 30, 2025 . 1.2K views 17:43

At Onyx Solar, we understand that every project is unique. To meet specific requirements, we offer two advanced photovoltaic (PV) glass ...

At the Twin Lakes Reservoir next to Lima's water treatment plant, construction crews are now in motion. Work toward building the ...

By this time next year, a 3,444-panel solar array will be floating on the southern half of the reservoir with the goal of producing enough energy to power the nearby water ...

The floating solar system will deliver 2 megawatts of capacity and include approximately 3,444 floating panels. Over its lifetime, the project is projected to save the City nearly \$10 million in ...

On October 23rd, the City of Lima broke ground on a new floating solar array, which will use clean energy to save money for ratepayers and taxpayers.

The floating solar project is expected to be completed and come online in the first half of 2026.

By utilizing floating solar technology, Lima not only maximizes the use of available space but also enhances the efficiency of solar panels through the cooling effect of water.

At Onyx Solar, we understand that every project is unique. To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline ...

Developed in partnership with clean energy firm D3Energy, the solar array is mounted on floating platforms

atop the reservoir rather than consuming valuable land ...

At the Twin Lakes Reservoir next to Lima's water treatment plant, construction crews are now in motion. Work toward building the city's \$5 million floating solar array is ...

Lima council passed an ordinance in May 2023 entering into a contract with a company that builds floating solar panels. Previous reporting said the project would be the ...
