Why should the UK and Europe attend the Energy Storage Summit?

The UK and Europe have a choice: move faster, co-ordinate, and scale the energy transition, or risk losing industrial leadership to those who will. The Energy Storage Summit is where decisions get made, ideas sharpen, alliances form, and the next phase of market design, financing models, and build-out strategy is forged.

Will energy storage growth continue through 2025?

With developers continuing to add new capacity,including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024,energy storage investments and M&A activity are expected to continue this trajectory through 2025.
