We should actively introduce, build and accelerate the production of key projects that are conducive to extending, supplementing and strengthening the industrial chain.

The two projects, spearheaded by the Yunnan Energy Bureau, are poised to revolutionize the energy storage sector by leveraging advanced vanadium flow battery ...

The 150MW/300MWh Yongde grid-forming shared energy storage project, supplied by Sineng Electric, has been operating stably for over two months. Marking a ...

The Yongde grid-forming shared energy storage project, supplied by Sineng Electric, has been operating stably for over two months. Marking a milestone for Yunnan ...

The Central Yunnan Water Diversion Project is a landmark project among the 172 water-saving and water-saving major water conservancy projects identified by the State Council, ranking ...

The project plans to adopt a non supplementary combustion compressed air energy storage process system, which belongs to the grid side energy storage facility. The ...

Co-developed by EVE Energy and SPIC Yunnan International Power Investment Co., Ltd., this landmark project demonstrates how new energy technologies can drive high ...

?Yunnan"s largest "source-grid-load-storage" new energy cluster project completed and put into operation?The independent shared energy storage station in Yongren ...

As a shared energy storage demonstration project in Chuxiong City, it will charge during off-peak hours and
