We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

With goals of 35-percent RE in the generation mix by 2030 and 50 percent by 2040, the Department of Energy (DOE) sees BESS as a crucial component in integrating ...

Are you a business owner curious about installing battery energy storage systems in the Philippines? Read our complete guide to learn more!

With goals of 35-percent RE in the generation mix by 2030 and 50 percent by 2040, the Department of Energy (DOE) sees BESS as ...

As the Philippines races to meet its renewable energy goals, Manila has become the epicenter of Southeast Asia's battery energy storage system (BESS) boom. Companies ...

Summary: Discover how Manila's energy storage charging stations combine cutting-edge battery technology with renewable energy integration. Learn about their role in supporting electric ...

For most Manila businesses, hybrid systems combining lithium batteries with smart inverters offer the best balance between cost and performance. Residential users might prefer plug-and-play ...

In September 2025, GSL ENERGY completed another installation of a 10kWh wall-mounted energy storage
