What does the Marshalls Energy Company do?

"The Marshalls Energy Company is a semi-autonomous utility company responsible for the generation, distribution and sale of electricity on a number of islands and atolls within the Republic of the Marshall Islands."

Does MEC sell LPG gas in the Marshall Islands?

MEC is the distributor of LPG gas throughout the Marshall Islands. Apart from generating electricity from diesel and solar installations, MEC has a 33,000 pound bulk storage capacity for LPG gas, which is decanted into smaller bottles.

What is ESS & how does it work?

ESS solutions capture excess energy when it is available to provide uninterrupted power when it's not. With up to 22 hours of energy storage, ESS' scalable, flexible solutions enable intermittent energy to provide baseload power to meet growing energy demand from AI data centers and an increasingly electrified society.

How many solar home systems did Marshalls Energy install?

The Marshalls Energy Company installed 3045 solar home systems (SHS) to families residing amongst the remaining atolls. Each SHS system has a capacity of 200W and were provided by multiple international donors.
