The government of Mauritius has welcomed the commissioning of a 20MW battery storage project which will provide frequency regulation to the East African island nation's grid.

The Henrietta project is a cornerstone of the nation's energy transition, combining a 60 MWp solar photovoltaic (PV) array with a substantial 240 MWh battery energy storage ...

The simulations of key scenarios demonstrate that a 100 % RE system for Mauritius is technically feasible within reasonable costs. Solar photovoltaic (PV) and battery energy ...

The CEB is committed to further expanding its BESS capacity to meet growing energy demands and support the integration of renewable energy. These efforts are part of a broader strategy ...

The CEB is committed to further expanding its BESS capacity to meet growing energy demands and support the integration of renewable ...

The four Stor"Sun solar plants located in Trou d'Eau Douce (SS1 and SS2), BalACLava (SS3) and Petite-Riviere (SS4) will integrate large scale Battery Energy Storage ...

The Government of Mauritius has inaugurated a 20 MW grid-scale battery energy storage system (BESS) at the Amaury Sub-station, ...

Part of the transmission network has been built to operate at 132kV when the need arises. The CEB's distribution system supplies electricity at lower voltages from its substations to around ...

The 20 MW BESS, to the tune of Rs 700 million, was supplied, installed and commissioned by SIEMENS
