How will the EU support Moldova in 2025?

It has a two-fold objective of decoupling Moldova from the insecurities of Russian supply of energy and fully integrating it in the EU energy market. Under this strategy, overall support for the Republic of Moldova would account to EUR250 million for 2025, of which EUR100 million will be provided by the EU by mid-April.

How does the EU support Moldova's energy system?

So far, the EU has already provided EUR240 million in direct budget support to Moldova's energy system from 2021 to 2024 to help the most vulnerable people. In the 2023-2024 heating season, more than 750 000 households have benefited from compensation through the EU-supported Energy Vulnerability Reduction Fund (EVRF).

What are Moldova's energy reforms?

Among other priorities, the instalment focused on energy sector reforms. Since 2022, Moldova's power system has been connected to the European continental electricity network. On 1 December 2024, the export capacity from the EU to Ukraine and Moldova was increased from 1.7 to 2.1 GW, including 315 MW for Moldova.

Does Moldova have enough electricity?

As of January 2025, Moldova has been able to purchase enough electricity to compensate for the lack of supply from the plant in Transnistria. But energy costs are already rising rapidly and are significantly more expensive for citizens across the country. The Moldovan government is offering subsidies for some households to help offset the costs.
