Will Morocco become a major exporter of solar panels?

Officials hope the project will turn Morocco into a major exporter of solar panels. The plant will have a production capacity of 30,000 tonnes per year, of which 85 percent will be exported to countries in Africa and other foreign markets, the ministry said, adding that the project will create 1,500 direct jobs and 2,000 indirect jobs.

What is Morocco's solar investment opportunities report?

The 'Morocco: Solar investment opportunities' report provides an overview of Morocco's business environment, and major macroeconomic trends, while analysing the regulatory framework and infrastructure network of the country.

Could Morocco develop a \$31 billion solar market?

Morocco has been locked in a drive to attract foreign capital into manufacturing and other sectors, including tourism and renewable energy. Earlier this month, a study by the Rabat-based Imal Initiative for Climate and Development said Morocco could develop a \$31 billion solar market.

Why should Morocco invest in solar energy?

With strategic investment in solar infrastructure, Morocco is poised to realise its full potential, accelerate its energy transition, and foster long-term sustainable growth." Morocco is committed to expanding its renewable energy capacity, aiming to reach at least a 52% share of its total electricity capacity by 2030.
