Several emerging energy storage technologies, including advanced lithium-ion batteries, flow batteries, solid-state batteries, and hydrogen storage, are expected to ...

has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated ...

This RFI solicits feedback on a proposed Blue Sky Training Program to train first responders, law enforcement agencies, local communities, and ...

The developments in California, Hawaii, and Texas underscore a nationwide push for long-duration energy storage (LDES) solutions that are essential for integrating renewable ...

From iron-air batteries to molten salt storage, a new wave of energy storage solutions is set to unlock resilience for tomorrow's grid.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

The U.S. Department of Energy (DOE) today announced up to \$325 million for 15 projects across 17 states and one tribal nation to accelerate the development of long-duration ...

January 13, 2025: The US has announced an investment of \$25 million for 11 projects designed to boost production of next-generation battery technologies for applications including grid energy ...

This RFI solicits feedback on a proposed Blue Sky Training Program to train first responders, law enforcement agencies, local communities, and utilities on responding to unanticipated failures ...

New energy storage projects include
