And here's the kicker: Oslo's off-grid solar storage project isn't just surviving - it's thriving in conditions that would make most solar panels file for Arctic hardship pay.

We have new owners and a new name, we started a pioneering project to construct a facility for full-scale carbon capture and storage at our Klemetsrud waste incineration plant, and we had ...

Ever wondered how a city known for fjords and northern lights is quietly becoming a global energy storage pioneer? The Oslo Grid Energy Storage Project is rewriting the rules ...

After setting impressive EV battery records, Norway has turned its focus to an even larger market: batteries for stationary energy storage - a market expected to reach EUR 57 billion by 2030. ...

Using disused mining infrastructure, the Oslo system lifts 8,000-ton concrete blocks during surplus energy periods. When demand peaks, controlled descents generate ...

As climate change intensifies and extreme weather events become more frequent, the Oslo portable energy storage project isn't just another tech innovation - it's becoming a lifeline for ...

And here's the kicker: Oslo's off-grid solar storage project isn't just surviving - it's thriving in conditions that would make most solar panels file for Arctic hardship pay.

By 2025, 80% of Oslo's storage capacity will directly support wind and solar farms. This addresses Norway's "green paradox" --excess renewable energy production during low ...

Our power storage project pipeline has experienced a notable surge, expanding from 95GW to over 115GW between Q4 2023 and Q2 2024 amid the intensifying global effort to supplement ...

The Northern Lights CCS project off the coast of Norway, which will begin operation by 2024, has enough storage for the equivalent of 750,000 car emissions every year in the first ...
