Why do we need a charging station in the Czech Republic?

"We believe that this type of charging station will contribute to developing the charging infrastructure in the Czech Republic thanks to its ability to compensate for the lack of electricity quickly and without taking up much space.

How does the Czech government cope with higher energy bills?

Unlike other European countries, the Czech Government has traditionally relied on the market to self-regulate, avoiding state intervention. This means that as prices rose, consumers and businesses had to cope with higher energy bills.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.

The ECO& Stor project brings innovations in the field of sustainable energy security, with a key focus on efficient electrical energy conversion and storage.

With EUR279 million in EU funding approved for 1500MWh of new energy storage capacity, the country is set to double its current storage capabilities and accelerate its ...

Czech energy supplier and charge point operator CEZ has installed a fast-charging station with battery storage in Prague. It is the first of its kind in the Czech Republic.

The project is primarily intended for grid frequency regulation, offering benefits such as stabilizing grid frequency, ensuring the safe ...

Summary: The Prague Wind and Solar Energy Storage Project has secured a major bid, marking a leap
