How much does an off-grid solar system cost?

Buying an off-grid solar system means you plan to generate and store your own electricity without depending on the national power grid. The entire package would contain: Depending on your chosen system, the off-grid solar systems in our inventory cost between \$6,595 and \$38,995. There are a few factors that influence the price.

What is an off grid solar container unit?

Attaching to the grid can also be expensive and this can be an issue in the UK as well as Africa or Latin America. An Off Grid solar Container unit can be used in a host of applications including agriculture, mining, tourism, remote islands, widespread lighting, telecoms and rural medical centres.

How much does a solar backup generator cost?

Consider installing a gas-powered backup generator for times when your solar panel system is not producing enough power for your home's energy demands. A whole-house generator costs \$6,000 to \$11,000 installed. Purchase all your off-grid system components from one manufacturer to ensure everything is compatible.

Are off grid solar containers reliable?

Solar equipment is very reliable but occasionally parts may fail so there is need to monitor and solve any problems. Off Grid Solar container units guarantee security and reliability and allow the engineering team to complete installations in a few days rather than weeks.
