The difference between POST and PUT is that PUT is idempotent, that means, calling the same PUT request multiple times will always produce the same result (that is no ...

I'm writing a webservice. Could any one explain these above methods and give me some example about them?

PUT is used by FB to update the comment because an existing resource is being updated, and that is what PUT does (updates a resource). PUT happens to be idempotent, in contrast to ...

-X PUT is redundant when using -T (which is short for --upload-file). This is basically the same as the accepted answer (which is a few years older).

PUT and PATCH methods are similar in nature, but there is a key difference. PUT - in PUT request, the enclosed entity would be considered as the modified version of a resource ...

I was wondering what people's opinions are of a RESTful PUT operation that returns nothing (null) in the response body.

I have few questions that: Although, it a restful api but specific application which would be used by an angular application, So should I return data in response of POST/PUT ...

Since PUT requests include the entire entity, if you issue the same request repeatedly, it should always have the same outcome (the data you sent is now the entire data of the entity). ...

Can I use a PUT method in an HTML form to send data from the form to a server?
