Reserve is building technology for Decentralized Token Folios (DTFs)--permissionless, tokenized indexes that create a more accessible financial system.

Instead of defending the \$1 peg until some Reserve holders are left with a worthless token, the Reserve Manager defends a peg that allows all Reserve holders to ...

That's why we built the Reserve Protocol. The Reserve Protocol lets anyone deploy a token that is issuable and redeemable for a basket of any other tokens. These "RTokens" are a new form of ...

Discover the intricacies of the Reserve Protocol. Dive into how RTokens work, from collateral baskets to minting and redemption, without getting lost in code details.

The first half of this post covers the strategy and background for this new phase, and the second half walks through how the new Reserve Index Protocol differs from the ...

Reserve is a cryptocurrency project. We want money that doesn't inflate like USD, but isn't volatile like Bitcoin. Our approach is to bundle stocks, bonds, gold, real estate and more into an index, ...

24/7 permissionless minting, redeeming and trading Transparent, real time proof of reserves onchain Available worldwide (ERC-20) One-click diversification Live now on Kraken

A USD stable coin which directly supports the Reserve Protocol by creating deflationary pressure to \$RSR via token burns and aims to become the stable coin of choice to ...
